News from ECOEI

29th Meeting of ECO Regional Planning Council

The President of the Educational Institute Prof. M. Akif KİREÇÇİ has participated in the Economic Co-operation Organization (ECO) Regional Planning Council (RPC) held on 17-20 December, 2018 in Tehran, Iran. During the RPC, eight Sectoral Committees deliberated numerous issues and at the closing session, the Draft Report, Work Program 2019 and the Calendar of Events 2019 were endorsed by the Council, which are to be carried out within the coming year.

ECOEI President Prof. KİREÇÇİ discussed the latest academic accomplishments and activities of the Institute and also elaborated the plan of organizing a conference on the teaching of history, literature and cultural heritage in ECO Member States. He emphasized the importance of member states’ guidance to ECOEI and invited them to convey their educational and higher education needs and concerns to the Institute.

The Workshop on “How to Write and Publish Articles for International Journals”

ECOEI organized a workshop on “How to Write and Publish Articles for International Journals” in Baku on 3 May 2019 in cooperation with Azerbaijan’s Ministry of Education. The workshop’s main objective was to enhance the academic writing skills of graduate students seeking a PhD degree in Azerbaijani universities and implement the procedures for submitting, evaluating and publishing academic journals. The course was attended by about 40 PhD students.
**Education in Numbers**

Where do ECO members stand in relation to the ten targets of the Sustainable Development Goals on education?

The UN developed several indicators to assess each member states’ attainment of SDGs. SDG-4 Data is compiled by UNESCO Institute of Statistics in order to monitor progress towards each SDG-4 target. Here are ECO Member States’ select educational data on Target 4.b, Target 4.1, and Target 4.c.

**Indicator 4.1.b.** Volume of official development assistance flows for scholarships, constant USD (2017)

<table>
<thead>
<tr>
<th>Country</th>
<th>Assistance Flows (constant USD)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Afghanistan</td>
<td>8,728,190</td>
</tr>
<tr>
<td>Australia</td>
<td>2,069,555</td>
</tr>
<tr>
<td>Azerbaijan</td>
<td>4,957,056</td>
</tr>
<tr>
<td>Belgium</td>
<td>11,303,306</td>
</tr>
<tr>
<td>Estonia</td>
<td>1,732,456</td>
</tr>
<tr>
<td>Turkey</td>
<td>789,846</td>
</tr>
</tbody>
</table>

SDG-4 Education 2030 sets out that the implementation of SDG-4 Targets and collecting the country data on indicators requires “national, regional and global mechanisms for governance, accountability, coordination, monitoring, follow-up and review, reporting and evaluation”. The goal of these targets is to create mechanisms for partnership and country-led actions. Thus, it requires countries to be inclusive, participatory and transparent when sharing the relevant data.

**Indicators**

4.1.1. Proportion of children and young people achieving at least a minimum proficiency level in mathematics

<table>
<thead>
<tr>
<th>Country</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Kazakhstan</td>
<td>79.70%</td>
</tr>
<tr>
<td>Kyrgyzstan</td>
<td>48.40%</td>
</tr>
<tr>
<td>Pakistan</td>
<td>57.10%</td>
</tr>
</tbody>
</table>

**Innovative Ideas for Education: Innovative Teaching Methods**

The way to create inspiring, motivational and interactive classroom is through implementing innovative teaching strategies. These teaching strategies will help to keep students’ attention up and achieve right mindset for effective learning.

**Peer Mindset**

The traditional classroom setting is where teacher is in the front or center and lecturing called teacher-centered method yet changing the classroom setting to a student-centered one will allow students to take responsibility and to engage. Teachers need to guide the learning process rather than taking all the stage in the classroom. Thus, the role of the teacher is not just to teach but also to mentor and to coach which will bring nurture and inspiration.

**Teamwork**

Another innovative teaching method is to encourage students to involve with their peers and collaborate for classroom activities and projects. While teamwork is an essential skill for their future, it will also increase and improve their communication, negotiation and empathy skills.

**Creativity**

It is not always easy to keep students attention up for the full classroom time which lead teachers to pursue creative teaching activities. In order to achieve creative learning, teachers should follow research-based teaching, and they should stay informed and updated about the new teaching methods.

**Flexible Learning Space**

Teachers can also be creative with the use of classroom space. Even the small changes like moving the furniture around can affect students’ attention and motivate them to be more active in the classroom. A classroom space should be able to provide areas of collaboration, ways for students to both work alone and interact with their peers. The flexible learning space could also cover informal settings beyond the classroom such as field trips or school clubs.

**SDG-4 Framework**

SDG-4 Framework consists of 10 targets to achieve open and inclusive opportunities for all. SDG-4 consists of 10 targets to achieve open and inclusive education around the world.

**Economic Cooperation Organization Educational Institute**
A Place for All
Teachers should also take different personalities in the classroom into consideration. Extroverts, introverts, energetics all have different needs in the classroom and different ways of learning. Whenever possible teachers should offer options for students to choose activities based on their learning style and create classroom settings where all of them could find their space.

Critical Thinking
Students need to have choices and voice in the classroom which will create a space for critical thinking. Teachers could utilize open-ended questions to which students can answer from various points of views. It will create a conversational atmosphere and help students to realize their potential and connect with each other through sharing their knowledge and experiences. Design-thinking process, where students identify and solve a problem they encounter in the class, could also support critical thinking.

Guest Speakers
Inviting guest speakers regularly to the classroom is a great way to inspire and motivate students. It will also create a venue for them to communicate, express themselves and reach out. These meetings could be virtual, in the classroom or outside the classroom.

Technology
The use of technology is an important way to reach out students who are the tech generation. This could be through use of smartboards in order to create better visual materials and activities, cloud computing or other ways to share, storage and present lecture materials or more advanced technologies like virtual reality and 3D printing. Technology offers a lot of resources for teachers and allow students to engage with different kinds of learning environments.

Future Events and Opportunities
November 6, 2019: Turkey Fulbright Commission will provide research grants to scholars wishing to do research at U.S. universities and research centers for the academic year of 2020-2021.
Deadline: If using post office, the deadline to send the application package is 6 November 2019 the latest in order to be received by 8 November 2019. If delivering by hand, the deadline to receive the application is 6 November 2019.
How to apply: Complete your application package and deliver it to Turkey Fulbright Commission Office in Ankara before the deadline.
To see the list of application package: https://fulbright.org.tr/data/files/Metin%20Icí%20PDF%20Dosyası/Akademik%20Araştırma%20Evrik%20Kontrol%20Listesi.pdf
For more information: If you have any question for the application process please reach out educational counseling unit at advising@fulbright.org.tr

November 12, 2019: UNESCO 40th General Conference will start its activities on November 12, 2019 at its head quarters in Paris, France and continue until November 27. The UNESCO General Conference meets every two years and attended by representatives from Member States and Associate Members, together with observers for non-Member States, intergovernmental organizations and non-governmental organizations (NGOs). The goal of the General Conference is to plan lines of work and policies of the organization along with upcoming programs and budgeting. It also elects the Members of the Executive Board and appoints, every four years, the Director-General.

Education News around the World
March 12, 2019: Iran launched its 1st National Game & Learning Plan for children which aims to benefit from the impact of intellectual games over students’ mental, physical, emotional and social growth. The first pilot education center in Iran has started the implementation of the plan in District 7 of Tehran. At this school, students learn their lessons by playing games and using creative learning techniques. This method makes educational concepts stick into students’ minds.

April 24, 2019: The Fourth General Assembly of the Turkic University Union was held in Turkistan hosted by the Hoca Ahmet Yesevi International Kazakhstan-Turkish University. The participants agreed to improve the capacity of the Orkhun Exchange Program and discussed the issues of mutual recognition and equivalence of education documents and academic degrees. The General Assembly also decided to establish an e-education platform as well as a research group on science and innovation.

May 7, 2019: The Board of Higher Education in Turkey lifts limits for university admission for international students. Previously, foreign students could only comprise up to 50 percent of the total students in any program. With the recent change, Turkish universities can now apply to the Board of Higher Education to enroll more foreign students. The change does not apply to the medical and dentistry schools. The decision aims to make Turkey an education hub and attract more international students.
